DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a method for improving yield, water-deficit survivability or water deficient tolerance in crop exposed to water deficit, comprising introducing a recombinant DNA construct expressing Hap3 protein operably linked to water deficit-inducible promoter, or wherein a transgenic seed and transgenic plant having in its genome said recombinant DNA construct encodes said protein having a consensus amino acid sequence of a gene and its encoded protein involved in herbicide resistance, or wherein the said seed further comprises a recombinant DNA construct which expresses a gene encoding an insecticidal protein, or wherein the said transgenic seed further comprises a recombinant DNA construct which is transcribed to RNA which forms gene silencing dsRNA targeted to a crop pest classified in class 800, subclass 289, for example.

Applicants are reminded that different nucleotide sequences and amino acid sequences are structurally distinct chemical compounds and are unrelated to one another. These sequences are thus deemed to normally constitute independent and distinct inventions within the meaning of 35 U.S.C. 121. Absent evidence to the contrary, each such nucleotide sequence and each amino acid sequence is presumed

Art Unit: 1638

to represent an independent and distinct invention, subject to a restriction requirement pursuant to 35 U.S.C. 121 and 37 CFR 1.141 et seq.

Applicants is required to elect one nucleotide sequence to be examined in conjunction with the elected group of claims: nucleotide sequence encoding an amino acid sequence for Hap3 protein having one of SEQ ID NOs: 2, 3, 6, 7, 8, 9, or 10. This requirement is not to be construed as a requirement for an election of species, since each amino acid sequence is not a member of single genus of invention, but constitutes an independent and patentably distinct invention.

A telephone call was made to Thomas Kelley on September 16, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Vinod Kumar whose telephone number is (571) 272-4445. The examiner can normally be reached on 8.30 a.m. to 5.00 pm.
